Nestled in the hills of Westlake, a family was in need of remodeling their beautiful yet dated home. The design was geared at updating the home with window treatments, warm modern bathrooms, hardwood floors, and custom furniture. With stunning views of Austin, the Master Suite became a romantic getaway for the couple. Opening the doors into the space reveals a richly layered design. Chocolate and metallic silver wallpaper provide the perfect backdrop to the custom eight-foot high headboard finished with hand-applied silver leaf.

### Residential Sustainable/ Green Design **LAURA BRITT DESIGN**

The remodel of this home began with a young family cramped in a small, single story house with an outdated kitchen and tiny master bathroom. Innovation and energy efficiency were the focus for this remodel. Numerous sustainable, recycled and reclaimed materials are featured in the home. Existing oak flooring, low VOC paints, countertops in locally manufactured limestone, Caesarstone and Icestone countertops, natural stone in the master and powder baths and locally fabricated custom cabinets made from domestic renewable hardwoods all contribute to the sustainability of the house. The City of Austin awarded the highest Austin Energy Green Building rating of 5 stars to the home.
